

# Battery cooling module

## Technical Information

Model:	JLE-X/B-D
Cooling Capacity	5.5 kW
Condenser Air Flow Volume(Zero Pressure)	2000 m3/h
Cooling Rated Input Power	2.5 kW
Recycle Water Flow	20 L/min (10 meters head of delivery)
Compressor	DC250-750V
Blower	DC27V
Water Pump	110W (DC24V)
Refrigerant Type	R134a
Dimension (Without Bracket )	650x540x400
Weight	36 kg

### Product features

Using the world famous brand compressor, frequency conversion control, ultra high energy efficiency. The evaporator adopts plate heat exchanger with small size and high energy efficiency. The condenser is a microchannel heat exchanger with high efficiency and energy saving. CAN bus intelligent control (optional vehicle CAN bus control), safe and efficient, advanced control mode. Using brushless pumps, full seal, long life, low noise.
